- 

## PROJECT

### NextJS, Firebase BaaS

- Project Name : Synapse
- GitHub repository link : <https://github.com/gaurisankartarasia/synapse> 
- Deployed site : <https://synapseweb.vercel.app> 

### Project description:

- Developed a web application using NextJS with social media features, allowing users to upload posts, comment, like, and share content.
- Integrated real-time bidirectional messaging, incorporating features like user authentication, follow requests, user activity control.
- Implemented JWT authentication for secure user login and session management.
- Utilized Firebase BaaS.
- Designed and implemented the user interface using Shadcn/ui, ensuring a responsive and user-friendly experience.
