## WORK EXPERIENCE & INTERNSHIP

MERN Developer , Mindtrack Technologies Private Ltd.

Oct 2025 - Present

### PROJECTS

**E-INDENT (Govt. Press of Odisha)** | ReactJS, Laravel, MySQL

- Used to order and supply, press & printing items for eg, books, forms to govt. organisations.
- End-to-end design and development of the E-INDENT Supply Management System, digitizing the government's manual procurement and inventory process
- Developed a robust RESTful API using Laravel, implementing complex business logic for indent approvals, stock management, and multi-stage workflow management.
- Implemented secure token based authentication and Role-Based Access Control (RBAC) to manage hierarchical permissions for various government officials.

**Enterprise Resource Planning** | ReactJS, ExpressJS, MySQL, Sequelize, NodeJS

- Used to keep records of an Organisation/Company, for eg. managing employee data, work routine, inventory, banking records, etc.
- Developed entire project using MySQL, ExpressJS, NodeJS, ensuring data integrity and seamless integration with front-end in React.
- Led a 6-member engineering team through the full development period, delegating tasks and conducting code reviews to ensure high-quality deliverables with 150+ pages.
- Architected and optimized a MySQL database schema featuring 55+ tables.

Full-stack Web Developer Intern, Mindtrack Technologies Private Ltd.

Jul 2025 - Sep 2025

- Developed full-stack projects using React JS, Express JS, MySQL & some Laravel.
- **Certifications:** React & Node JS Developer Internship, Mindtrack Technologies Pvt. Ltd.

### PROJECTS

**Directorate of Public Health, Odisha CMS** | ReactJS, ExpressJS, MySQL, Sequelize, NodeJS

- Dual-Interface Design: Public End: Engineered a high-performance interface for citizens to access public service information and resources developed during internship.
- Admin End: Developed a secure management dashboard for officials to update content, manage user permissions, and track service analytics
- Led a 6-member engineering team through the full development period, delegating tasks and conducting code reviews to ensure high-quality deliverables.
- Designed a centralized MySQL database to handle diverse content types, ensuring data consistency across both the public and admin interfaces.

---
